Personal Summary

I am a self-taught python developer currently residing in the Philippines, I build web applications from the ground up using python and I'm always looking to expand my skill-set and grow

I'm willing to take on any challenge that is put in front of me. I am always happy to roll up my sleeves and get stuck in whenever the time calls for it. I have a decent programming skills and a passion for developing applications that deliver great user experiences.

Right now, I'm looking for a suitable role with a company that values people from all backgrounds and provides them with a relaxed, creative and supportive environment where they can do their best work.

Skills And Competencies

- Python (Flask)
- Extensive experience with general web technologies like HTML5, CSS and API integration
- Writing reusable, testable and efficient code.
- Excellent knowledge of SQLachemy, PostgreSQL including database design and administration
- Having a can-do attitude, in everything I do.

Projects

► Bugtrackerr

This is a project created for companies/agencies to get started in minutes and start managing their projects while collaborating with their project managers and developers effectively
